Synopsis

Modern procurement methods for engineering and building projects typically involve complex, multi-tiered contract structures. Between principals, designers, consultants and constructors, each tier involves different roles and different levels of responsibilities and performance risks. Balancing these risks gives rise to ever more complex legal relationships within a given project. As the construction industry and its surrounding marketplace matures, these complex legal relationships play out in the form of sophisticated claims and legal disputes in arbitration and in the Courts. In this connection, the role of the expert is indispensable in assisting judges, arbitrators, lawyers and their clients in legal proceedings.

The Singapore Institute of Surveyors and Valuers (SISV) is proud to bring to you a half-day seminar on this subject. This workshop focuses on the issues and must-know facts that concern today's construction expert.

Who Should Attend

Quantity Surveyors, Valuers, Land Surveyors, Property Managers, Facility and Asset Managers, Real Estate Brokers, Project Managers, Claim Consultants, Engineers, Contractors, Architects, Developers, Bankers, Lawyers, Mediators, Arbitrators, Loss Adjusters, and Insurers.

Certificate of Attendance

Certificate of Attendance will be awarded upon successful completion of the programme.
