

## BCA - SPM JOINT SEMINAR 2014

# PRODUCTIVITY IN PROJECT DELIVERY The Project Manager's Role

23 July 2014 • 9.00am - 5.00pm  
Concorde Hotel

Productivity improvements have been a major and continual concern for professionals and practitioners, including Project Managers, in the delivery of construction projects. While the use of innovations, technologies and systems have improved productivity, these are mainly focused on the downstream stages (i.e. Building/Construction and installation) of projects. The upstream management and initiatives by the Project Manager are equally critical in reaping productivity gains. This Seminar aims to move the spot light upstream to focus more on design development and management of stages prior to construction, and how project management and the role of the Project Manager can contribute to higher productivity in the whole project delivery process.
