

Celebrating 50 Years of Engineering Excellence

YOU CAN NAME SINGAPORE'S TOP ENGINEERING ACHIEVEMENTS!

Singapore's pioneer engineers have made significant contributions in building our nation and transforming this city-state from third world to first. In the process, they have engineered numerous solutions that have impacted our lives.

In celebration of Singapore's 50th birthday in 2015 and IES' 50th anniversary in 2016, The **Institution of Engineers, Singapore (IES)** will be launching Engineering Feats @ IES-SG50 in July 2015 in appreciation to our engineers for their contributions in the past 50 years. This is a competition to seek out and recognize the top 50 engineering achievements across the various fields of engineering deemed by Singaporeans to have made the greatest economic, infrastructural or societal impact to Singapore.

What do you regard as the most outstanding engineering achievement in Singapore? Send in your nomination to the Engineering Feats @ IES-SG50 competition today, so that it will go down in history as one of the top 50 engineering achievements that had shaped Singapore in the past 50 years.

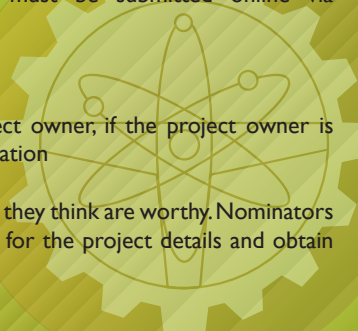

HOW TO ENTER

Engineers or project owners (such as companies or organisations) can submit their engineering achievements or projects for the competition. All entries must be submitted online via **www.ies.org.sg/sg50** by 30 November 2015.

All entries must include:

- Completed entry forms with formal consent from the project owner, if the project owner is available, and a project report to support the proposed nomination

Members of the public can also nominate engineering projects that they think are worthy. Nominators are required to contact the project owners, if they are available, for the project details and obtain their consent.

CRITERIA

- The completion dates of the engineering projects or commercialization of engineering products must be between **1965** and **2015**
- Engineering projects or products should have made significant impact to the society at time of its inception and, in particular, contributed to Singapore's economic growth or well-being of its citizens.

Nominations may be for any scale of engineering projects, engineering systems or products that are deemed impactful or highly innovative, whether in design, manufacturing, product or systems integration.

The type of projects and products that can be nominated may be from, but not limited to, the following industries:

- | | |
|--------------------------|---------------------------|
| • Aerospace | • Infocommunications |
| • Built Environment | • Infrastructure |
| • Chemicals | • Manufacturing |
| • Defence and Security | • Marine and Offshore |
| • Electronics | • Media and Entertainment |
| • Energy | • Transport and Railway |
| • Environment and Water | • Utilities |
| • Healthcare and Medical | • Waste Management |

JUDGING PROCESS

All submissions will be reviewed by a panel of judges from the private and public sectors. Shortlisted entries will be put up for public voting through various media. The **top 50** projects with the highest number of votes will clinch the title of **Top 50 Engineering Feats**.

Significant Dates

Submission of Projects: 21 August 2015 - 30 November 2015

Public Voting: 1 March 2016 - 30 May 2016

Announcement of Winners: 1 July 2016 @ IES-SG50 Golden Jubilee Dinner
