10TH ICEC 2016 WORLD CONGRESS

10th ICEC 2016
Cost Engineering, Quantity Surveying
& Project Management
World Congress

The year of 2016 has been one of many achievements for ICEC's Region 1 (Americas). The biggest one of all was certainly the 10th ICEC World Congress in Rio de Janeiro, from October 7th to 12th. IBEC proudly welcomed its partners from ICEC coming from every corner of the planet to share knowledge, technique, opinions, information, experiences, and also to make important decisions. For the last two years Region 1 has been under the responsibility of Eng. Paulo Dias, President of IBEC, and after unanimous election during this year's Council Meeting, the mandate has been extended until 2018, which will allow us to continue the activities already in motion, highly important for the development of the science of costs in the Americas, to strengthen the links between the countries of this vast territory towards a greater integration of ICEC in the region.

The ICEC Council Meeting happened on October 08th and 09th and preceded the 10th ICEC 2016 World congress – Cost Engineering, Quantity Surveying and Project Management. One of the more significant results was the creation of new guidelines regarding ICEC's official website (icoste.org) for promoting and improving communication between professionals from all countries: standardizing scientific terminology – idioms and expressions and technical jargons etc – and developing and promoting a broader, more wide-ranging translated media in order to facilitate the interchange of techniques and experiences, once Region 1 has English-, Spanish-, Portuguese- and even French-speaking countries.

Board of Directors at the ICEC Council Meeting

The Council Meeting had the participation of 15 nations, 4 of them being from Region 1: United States, Honduras, Colombia and Brasil; 5 from Region 2: United Kingdom, Slovenia, Netherlands, Italy and Denmark; 4 from Region 3: South Africa, Nigeria, Kenya and Ghana and finally 2 from Region 4: Hong Kong and Australia. With representatives from IBEC, AIQS, AACEi, ACOSTE, AICE, AICH, ASAQS, DACE, DPM, GhIS, HKIS, IQSK, NIACE, NIQS, SCI, ZPM, the Meeting assembled a total of 35 people among Chairmen, CEOs, Vice-presidents, Directors, Deputies and Managers. Along with a group of participating audience that number raises up to almost 50 professionals.

New positions were also created: Alexia Nalewaik, past president of ICEC, was elected Research Director – a task aimed at the development and growth of ICEC's shared knowledge base, focusing efforts in fostering and coordinating collaborative studies and information interchange between its member institutes. Other new positions were also created: A ICC-IPMA Collaboration Director and an Ad hoc Director for the Middle East. These positions come to stimulate the creation and search for new entities, eligible for becoming ICEC members – a work very similar to what Eng. Paulo Dias, IBEC President, has been doing in Latin America as Region 1 Director, crossing the continent in the pursue of new partners for the Council.

The year of 2016 has been one of many accomplishments. Region 1 has performed congresses, ceremonies and seminars and signed collaboration agreements between its own members and with the other regions. Great events, such as the Cost Engineer's Day in Brazil on May 23, preceded by the International Meeting and celebrated in Rio de Janeiro-RJ; the FeiCon/BATIMAT International Construction Fair, from 19 to 21st of October, 2016, in Olinda-PE, and which will happen again in São Paulo on April 4th to 8th, 2017; the Intercon – Construction Exhibition and Congress, held in Joinville-SC.

CONGRESS

The authorities present at the table opening the 10th ICEC World Congress were: ICEC Chair Alexia Nalewaik; IBEC Chair and Region 1 Director Paulo Dias; Secretary-general of ICEC, Peter Smith; ICEC Vice president TT Cheung, IPMA Global Chair Reinhard Wagner; Director of Civil Constructions of the Brazilian Navy Admiral Flávio Macedo; RICS Chair Amanda Clack; President of CREA-RJ Reinaldo Barros; President elected of UPADI (2017-2019) Maria Tereza Zapata; Vice president of IBEC and director of the 10th ICEC World Congress José Chacon de Assis; President of Mútua Paulo Guimarães and the president of AACE International John Livengood. The 10th ICEC World Congress had the participation

of 27 nations: Argentina, Bolivia, Brazil, Chile, Colombia, Cuba, Honduras, Paraguay, United States, England, Croatia, Denmark, Italy, Netherlands, Portugal, Slovenia, Turkey, United Kingdom, Ghana, Nigeria, Kenya, South Africa, Australia, China, Hong Kong, Malaysia and New Zealand. As a result of the high demand, the event was visited by around 600 professionals. The paper presentation

sessions had 80 scientific works exposed, raising awareness to various themes in Cost Engineering and Project Management, defined in the agenda proposed by the Scientific Committee, from a total of 214 abstracts submitted. Such a success was possible only due to the immense dedication of all members of the Council for the advance of ICEC in the region and in the whole planet.

WORK IN REGION 1

Sustainability and Project Management Seminar in Colombia

Paulo Dias greeting UNAICC President Mercedes Savigne

Paulo Dias visit SIB in Bolivia

Region 1 was also represented by IBEC in Spain during the International Cost Engineering Congress in Madrid (March 2nd and 3rd, 2016). Besides, as a result of the partnership from two new technical and scientific agreements signed by IBEC, the institute performed the Cost Engineering, Sustainability and Project Management Seminar in collaboration with SCI – Sociedad Colombiana de Ingenieros and SIB – Sociedad de Ingenieros de Bolivia. This Seminar happened

in Bogota (Colombia) on April 1st and in Santa Cruz de La Sierra (Bolivia) on April 7th and 8th. There was also the Lecture in the Palacio de Convenciones de Habana, the Conventions Palace of Habana, during the Technical and Scientific Construction Conference on April 04-07 by invitation from UNAICC – Unión Nacional de Arquitectos e Ingenieros de la Construcción de Cuba. Another very important collaboration was the alliance

with Colegio de Ingenieros Civiles de Honduras, whose contact with ICEC during the Reunión Intermedia 2015 held by UPADI (Panamerican Union of Engineer Associations) in Roatán – Islas de la Bahía, from July 1st to 3rd, through IBEC, representing Region 1, caused its affiliation to ICEC, which was formalized in this year's ICEC Meeting and made public during the 10th ICEC World Congress' Galla Dinner last October in Rio de Janeiro.

These practices are important to proceed with the work done by the IBEC team to reach other countries in Latin America and bring them closer to contribute in the reinforcement of ICEC's actions. In the Council Meeting, as well as at the exhibitions and presentations at the Congress, many global topics were discussed, and yet special attention was dedicated to regional issues during the readings of each region's biannual report on the first day and also their considerations after the sectional meetings on the second day.

Between the subjects addressed at the discussion panels, the attendants had the chance of observing and participating on debates entitled Public work Biddings, with the presence of Paulo Dias (President of IBEC and ICEC's Region 1 Director), Aldo Dórea (President of AACE Brazil), Diana Bula (President of SCI-Sociedad Colombiana de Ingenieros) and Calvin Speight Jr (RICS' Consultant); also Innovative trends in Project Management, with Reinhard Wagner (President of IPMA Mundial), José Angelo Valle (Technical vice president of ICEC), Raphael Albergarias (President of IPMA Brazil) and TT Cheung (President elected of ICEC) and The Reality of Cost Engineering worldwide, a subject debated in two sections, the first being composed of Alexia Nalewaik (President of ICEC 2014-2016), Julie Owen (Ex-president of AACE International), John Livengood (President of AACEi Region 1) and Paulo Dias (President of IBEC) and the second one with Peter Smith (Secretary-general of ICEC), Alec Ray (Director of ACOSTE), Alan Muse (RICS) and Gianluca di Castri (ICEC Region 2 Director).

The scientific works presented in the four simultaneous rooms approached important issues such as 'Project Audit Process and Project Governance to improve Results' (winner of Congress' Best Paper award, by the Brazilian Walter Krause, Director of EMBRATEL-Claro); 'International Measurement standards: Space, Cost and Technology'; 'Comparative Study Budget run on Platform BIM 5D and Conventional Budget based on 2D Autocad design'; among many others.

At the exhibition area the visitors could get in touch with exhibitors from the Brazilian Navy, FUNASA-Fundação Nacional de Saúde, AIQS-Australian Institute of Quantity Surveyors, who is organizing the 11th ICEC World Congress of 2018 in Sydney-Australia, as well as Itaipu Binacional, IBEC (the Brazilian Institute of Cost engi-

neering), CREA-RJ – Conselho Regional de Engenharia e Agronomia do Rio de Janeiro, Mútua-Caixa de Assistência aos Profissionais do CREA, Editora PINI, SENGE-RJ/FISENGE – Sindicato dos Engenheiros do Rio de Janeiro and Federação Interestadual de sindicatos de Engenheiros, respectively.

The 10th ICEC World Congress was a project by ICEC and IBEC alongside with IPMA (International Project Management Association), AACeI (Association for the Advancement of Cost Engineering – International), UERJ (Universidade Estadual do Rio de Janeiro) and RICS (Royal Institution of Chartered Surveyors). The event was sponsored by ITAIPU BINACIONAL, system SENGE-RJ/FISENGE, Caixa Econômica Federal, FUNASA (Fundação Nacional de Saúde), CREA-RJ (Conselho Regional de Engenharia e Agronomia do Rio de Janeiro), Systech International, Ministério da Saúde, Mútua (Caixa de Assistência aos Profissionais do CREA), BOCATER (Bocater, Camargo, Costa e Silva Advogados Associados), and it had institutional support from the system CONFEA-CREA-Mútua, Rio de Janeiro City hall, ABC (Associação Brasileira de Custos), FEUP (Faculdade de Engenharia da Universidade do Porto), NPPG Poli/UFRJ, Faculdade Presbiteriana Mackenzie Rio, Grupo IDD (Instituto Daher & deLuca), Universidade Santa Úrsula, INPG, PINI, Instituto de Engenharia, Instituto de Engenharia do Paraná, Clube de Engenharia, FEBRAE (Federação Brasileira de Engenheiros), Academia Nacional de Engenharia, UPADI (Unión Panamericana de Asociaciones de Ingenieros), CICH (Colegio de Ingenieros Civiles de Honduras), Global Partners Bayern e. V., USAL (Universidad del Salvador), CPIQ (Consejo Profesional de Ingeniería Química), Ordem dos Engenheiros de Cabo Verde, ALAEST (Associação Latino americana de engenharia de Segurança), UNAICC (Unión Nacional de Arquitectos y Ingenieros de la Construcción de Cuba), Project Builder, AENFER (Associação de engenheiros Ferroviários), Instituto Águas da Terra, SBEF (Sociedade Brasileira de Engenheiros Florestais) and IBRAENG (Instituto Brasileiro de Auditoria de Engenharia).

ICEC Secretary- General Report

By Dr Peter Smith

Welcome to the December 2016 ICEC International Roundup Newsletter. This newsletter is usually published twice a year in March and October. This edition has been published in December to enable incorporation of the outcomes of the 2016 ICEC World Congress and Council Meeting.

I would like to encourage all member associations and their individual members to contribute articles and other relevant information for each newsletter. It provides a good opportunity to promote congresses, seminars, forums, projects and other activities of your association.

On behalf of ICEC I would like to thank and congratulate the Brazilian Institute of Cost Engineers (IBEC) for hosting and organising the 10th ICEC World Congress, ICEC Council Meeting and other associated meetings in Rio de Janeiro, Brazil from 8-12 October 2016. The event was organised with a high level of professional expertise and was an outstanding success with a high level of attendance. My report provides details of the main outcomes of the Congress and meetings

ICEC Council Meetings

The 40th Meeting Session of Council was convened on 8-9 October 2016 in Rio de Janeiro, Brazil in conjunction with the 10th ICEC World Congress. ICEC holds its Council meeting every 2 years in conjunction with the ICEC World Congresses which are also held on a biennial basis. This is supplemented by annual regional meetings in each of the 4 ICEC Regions (North/South America, Europe and Near East, Africa and the Asia Pacific). ICEC Chair, Alexia Nalewaik, chaired the meeting which was well attended by ICEC office holders, ICEC member association delegates/representatives and observer delegates from kindred associations.

The Council Meeting Agenda and Agenda Book can be found on the ICEC website at: <http://www.icoste.org/members/minutes/#more-48>

The Council Meeting minutes and the approved ICEC Budget for 2016-18 will also be posted on the ICEC website shortly.

2016-18 ICEC ACTION PLAN

A major outcome of the 2016 Council Meeting was the approval of a 2016-18 Action Plan that will incorporate a number of Committees to work on specific ICEC activities and projects. These comprise both existing committees from the 2014-16 Action Plan and new committees. The Action Plan provides a clear framework for the development and implementation of these various activities and projects.

Each Committee has a designated team leader supported by team members. The following committees have been approved:

1. Develop written policies & procedures for ICEC
2. Establish a baseline Body of Knowledge that includes both cost engineering and quantity surveying
3. Develop action items for maximizing Memorandums of Understanding and Cooperative Agreements, with a focus on research
4. Upgrade the ICEC website
5. Maintain and grow ICEC membership
6. Significantly increase marketing of ICEC
7. Develop a strategy for the participation of younger members in ICEC activities
8. Update the online journal
9. Improve the Bi-Annual Roundup Newsletter
10. Integrate research and education programmes into ICEC activities
11. Coalition Member of International Construction Measurement Standard
12. Continue efforts toward development and implementation of United Nations Strategy

Members of ICEC member associations are welcome to join any of these committees. If you are interested please email the ICEC Secretariat at secretariat@icoste.org and we will put you in touch with the relevant team leader.

The ICEC Executive Officers for 2016-18 were elected at the Council Meeting. The new Executive and Regional Officer Positions are as follows:

ICEC Executive Board:

Chair:
TT Cheung (Hong Kong)

Senior Vice-Chair:
Kwadwo Osei-Asante (Ghana)

Administrative Vice-Chair:
Gianluca di Castri (Italy)

Administrative Vice-Chair:
Julie Owen (USA)

Technical Vice Chair:
Professor Angelo do Valle (Brazil)

Secretary-General:
Dr Peter Smith (Australia)

Advisory Board Chair:
Roger Batten (United Kingdom)

Immediate Past ICEC Chair:
Dr Alexia Nalewaik (USA)

Advisory Board Chair:
Roger Batten (UK)

ICEC Region Directors

Region 1 Paulo Dias (Brazil)

Region 2 Alec Ray (United Kingdom)

Region 3 Kofi Obeng Ayirebi (Ghana)

Region 4 Eugene Seah (Singapore)

ICEC New Director Positions

Two new ICEC officer positions for 2016-18 were approved at the Council Meeting as follows:

Research Director:

Dr Alexia Nalewaik (USA)

Director – ICEC/IPMA Collaboration (Reg 2)

Andrej Kerin(Slovenia)

A further Director position was approved for the Middle East region (currently not represented within ICEC). Nominations for this position will be sought within the next month – ICEC member associations are encouraged to put forward their nominations.

ICEC Region Deputy Directors & Region Assistant Secretaries

The ICEC Region Directors will consult with their relevant member associations and the ICEC Executive to appoint ICEC regional deputy director and assistant secretary positions. It is anticipated that these positions will be confirmed before the end of the year.

2016 ICEC Award Winners Distinguished International Fellow (DIF) Award

The ICEC Distinguished International Fellow (DIF) award was introduced in 2002 and represents the highest honour that ICEC can bestow on an individual. It recognizes individuals who have made significant contributions to ICEC and to the association or institute of which they are a member for a period of years. The recipients must be nominated to receive the award by an ICEC member association or institute. They must:

1. Have held a significant volunteer position in both ICEC and a member association or institute;
2. Have had significant involvement over a period of several years in both ICEC and a member association or institute; and
3. Must have made a significant contribution to the development of the cost management profession.

The criteria is assessed at a very high level to preserve the eminence and prestige of the award. Previous DIF award winners can be found on the ICEC website at:

<http://www.icoste.org/awards/icec-distinguished-international-fellow-dif-award/#more-316>

The 2016 DIF Award Winners were:

Madhu Pillai (Saudi Arabia/USA)

Emanuele Banchi (Italy)

Dr Peter Smith (Australia)

Professor Angelo Valle (Brazil)

2016 ICEC Chair and Regional Award Winners

The following ICEC Chair and Regional Awards were also conferred at the Council Meeting:

Chair Awards:

TT Cheung (Hong Kong)
Peter Smith (Australia)

Region 1 Awards:

State Deputy Luis Paulo (Brazil)
State Deputy Paulo Ramos (Brazil)

Region 2 Awards:

Andrej Kerin (Slovenia)
Alec Ray (United Kingdom)

Region 3 Awards:

Prof JJP (Basie) Verster (South Africa)
Prof Rob Pearl (South Africa)

Region 4 Awards:

Julie Cruz (The Philippines)
Keith Yim (Hong Kong)

Special Central/South American Awards

The Special ICEC awards were presented to the following people who have made a significant contribution to the development of Cost Engineering in Central/South America:

Edson Bez da Silva (Edinho Bez)

Maria Teresa Zapata

Maria Teresa Pino

Alejandro Vargas

Alfredo Serpell

José Calix

Diana Espinosa Bula

MNST Eng. Amparo López

2016 ICEC Jan Korevaar Outstanding Paper Award

The ICEC Jan Korevaar Outstanding Paper Award recognizes the best paper presented at each ICEC World Congress as evaluated by Congress delegates. The award was created in memory of Jan Korevaar, Executive Director of the Dutch Association of Cost Engineers and Assistant Secretary of ICEC for many years.

The 2016 Jan Korevaar Outstanding Paper Award for the best paper at the 2016 ICEC World Congress was awarded to:

Walter Krause

for his paper titled:

“Project Audit Processes & Project Governance to Improve Results “

This award winning paper will be available shortly on the ICEC website at:

<http://www.icoste.org/category/awards/>

2016 Kenneth K. Humphreys Outstanding Paper Award

The Kenneth K. Humphreys Outstanding Paper Award was introduced in 2008 in recognition of Dr. Humphreys' service as ICEC Secretary-Treasurer from 1976 until 2006. The award is available to students or young practitioners under 36 years of age and is based on papers prepared on topics related to Cost Engineering, Quantity Surveying and Project Management. One award can be given in each of these topic categories if papers are deemed to be of sufficient merit. Papers must be submitted by ICEC member associations.

The 2016 Kenneth K. Humphreys Outstanding Paper Award Winners were:

Cost Engineering Category

Muhammad Yaseen Bhamjee (South Africa)

Paper Title: Lighting Retrofits - Home Owner Mind-Sets Toward Energy Efficiency

Submitted by: Association of South African Quantity Surveyors (ASAQS)

Project Management Category

Jessica Colbert (USA)

Paper Title: Avoiding CPM Schedule Mismanagement: Maximize Uses

Submitted by: AACE International

The award winning papers will be available shortly on the ICEC website at:

<http://www.icoste.org/category/awards/>

The reality of cost engineering worldwide

By Gianluca di Castri,
ICEC Admin Vice Chair

The structure of our profession is quite different in different parts of the world, albeit with a strong common ground. A look inside the list of associations that belong to the International Cost Engineering Council shows three different groups that are “Cost Engineering”, “Project Management” and “Quantity Surveying”, all included under the label of “Project Cost Management”, as proposed in 2012 by Peter Smith and now generally accepted.

My proposal, at that time was to adopt the term “Project Economist”: in reality, this term seems

to be very significant in the variety of the English language used by speakers whose mother tongue is a Latin language, albeit the speakers of English as a mother tongue could understand it with a different meaning.

A lot of differences between the way our profession works in different parts of the world: the first difference we found at the entry level, namely when people is being authorized to act as professional. In Latin countries, the authorization is granted through a vertical, top down procedure, by a higher authority, normally through a mixed committee, academic and professional, while in English speaking countries, the authorization comes through a horizontal procedure, that it's basically an acceptance by the peers.

A lot of mixed schemes, that are now the majority, take characteristics from both methods.

In the majority of Common Law countries, Cost Engineering and Project

Management have had a separate development, like two fully independent disciplines. The relevant professions are separate, like in England, in the majority of the Commonwealth countries, in the United States of America.

In continental Europe, as well as in other countries belonging to the Civil Law group of countries, the profession of Cost Engineer, Planning Engineer, Project Controller and Project Manager have had a common and sometimes confused development. This can also be understood from terminology: while in Anglo-Saxon countries we have different definitions for Cost Engineering, Project Management, Planning Engineering, Quantity Surveying, in Latin countries the overall term of Ingegneria Economica (Ingeniería Económica, Financiera y de Costos) has been used since the beginning. In 1998, this overall concept has been accepted by the ICEC, as Total Cost Management, whose meaning is corresponding to the

meaning of Ingegneria Economica, as far as the different languages will allow the correspondence.

In the world as a whole, there are several cooperating professions in engineering and construction, such as Project Managers, Project Controllers (the boundary between management and controls is not completely defined in several countries), Cost Engineers (the term cost engineer is difficult to understand in some countries, somewhere they are confused with cost accountants), Cost Managers, Total Cost Managers, Project Cost Managers, Construction Economists, Risk Analysts, Quantity surveyors (whose competencies in Italy and other countries are distributed among other professions), and so on. In reality, all of them are part of the “project profession”, that has not yet been neither defined nor recognized.

The very concept of project is changing horizontally and vertically: horizontally, extending thorough the whole life cycle of a project and vertically from project and multi-project to programme, portfolio and, why not, meta-project. As far as project controls are concerned, this reflects in project controls made on behalf of a general contractor, that is where project controls originate from, or on behalf of the owner, albeit commonly called project monitoring, or on behalf of stakeholders and third parties, that is project auditing.

A strong joint effort is needed, the project profession as a whole can have a strong voice, while the single professions are neglected. As a term of reference, the lawyers are actually civil, criminal or administrative lawyers, but they can speak with a single voice as lawyers; the medical profession includes for surgeons, neurologists, dentists and so on, but it's recognized as a whole as medical profession. We are not recognized as a single profession, and this is why we are weak.

Let's have a look to the other points to be worked out:

- the body of knowledge, that should be compared inside the ICEC, to define the common ground between the member associations, as well as among the other professional federations. This work is slowly in progress since year 2000 and, as it goes on, clearly appears that what we knew since the beginning was true: the various bodies of knowledge have a common ground of about 70% to 80% and probably the different professions are building

diversified competencies on a common body of knowledge.

- certification, that has to be normalized, creating a common method to compare and accredit the levels among different associations and certifying bodies,
- and project semantics, that could easily be done by completing and updating the multi-lingual glossary prepared by the former French association AFITEP and included in the standards of AFNOR in year 2000, through a proper integration with the glossaries prepared by other associations.

To reach those goals, there is a need of a strict cooperation among our professional associations, respecting the various identities and without trying to encapsulate each other. Unfortunately, after thirty years of globalization, we are shifting again toward localism and particularism, this does not help.

As far as the ICEC is concerned, I believe that we should increase our level of activities in order to become the leading party, or at least one among the leading parties, in the creation and establishment of the “project profession”. For doing so,

- the first step shall be the recognition of the professional market, identifying all the concerned professions and relevant associations;

this will be mainly a work of documentation, that can be quite completely done by few persons sitting in front of a computer and browsing the web together with their personal knowledge and relationship,

- the second step shall be to create a network of contacts with the associations that we already know together with the further associations identified in the first step, aiming at creating, through a progressive work, a common platform and some common events in order to know each other and agree the common path to follow,
- the third step, in principle, should be to define a common scope and the relevant instruments, that, for instance, could be a second level federation including for ICEC, IPMA, RICS, and others: however, we have not yet the elements to define whether we shall arrive to the third step nor to identify it.

Needless to say, in order to work on this project, in the interest of the member associations as well as of every project professional, the ICEC needs quite a substantial increase in its financial resources, whose terms must be studied and defined.

GaMP in UAE Chapter Launched

The Philippine Institute of Certified Quantity Surveyors (PICQS) launched Guidance and Mentoring Programme (GaMP) in the United Arab Emirates (UAE) on 9 September 2016. Guidance and Mentoring Programme (GaMP) is a six-week training and comprises 12 sessions regarding the written submission (competency statements and case study) of APC* candidates. Each session consists of two CPD hours.

GaMP is open to PICQS Members who, primarily, are graduates of P3T** & PAP1**, Probationer and Associate Members who are APC registered. GaMP is part of the PICQS' structured programme accredited by International Cost Engineering Council (ICEC). GaMP in the UAE successfully concluded on 21 October 2016 through a simple graduation ceremony. PICQS GaMP has earned a lot of praises and positive feedbacks from the 34 Trainees for the additional knowledge they have gained through six consecutive weeks of training. The Trainees also had expressed their gratitude to the 12 Trainers who unselfishly have shared their knowledge, experience and time which makes the event which makes the event a more successful one.

Again, it's another milestone for PICQS!

Visit us on www.picqs.org.

Note:

Subcontracting, Novation and ICMS CPD Event

PICQS has conducted a CPD event on Subcontracting, Novation and ICMS last 30 July in Manila, Philippines with its own Chair and Founder, Julie Christie M. dela Cruz, as the speaker.

The event was attended by 220 participants, both Members and Non-Members.

The CPD event was held in two parts wherein Julie discussed Subcontracting, Novation and Assignment on the first part. And being an ICMS Trustee and an elected General Secretary, Julie discussed on the second part the importance of the International Construction Measurement Standard (ICMS) especially to the Philippine construction industry.

Currently, the Philippines is using different measurement standards, resulting to significant differences in cost even for typical projects. This results most, if not at all times, the struggle to compare cost data to provide a meaningful benchmark.

The integration of the ICMS into the curriculum in the first QS school in the Philippines and to all PICQS trainings is of a priority in order to ensure that all practicing quantity surveyors adhere to one universal standard.

We are pleased to announce that on 10th October at the ICEC (International Cost Engineering Congress) conference AACE signed a new Memorandum of Understanding with RICS www.rics.org .

This MOU is modeled after other Association MOUs and establishes, like many of our other MOU's reference to "work product" that should be forthcoming for the two entities, and provides a framework to acknowledge each other's Intellectual Property, Certifications, and opportunities to collaborate on an increasingly global scale on various industry initiatives.

AACE International and RICS had MOU dated July 17th 2001, which was amended November 8th 2001 to include a reciprocity agreement, and dissolved unilaterally in by the RICS, and subsequently announced to AACE membership 26th January 2011.

Despite the perceived discord the two organizations have continued to work together in coalitions, collaboration, and in furthering property and construction profession. Most recently in collaboration within industry leadership to provide RICS membership with an "Insight paper on Project Controls in North America", and international initiatives, e.g. ICMS – an international collaboration to set an International Standard for Construction Measurement, www.icms-coalition.com, in which Martin Darley is Vice-Chair of trustees, and Dr. Phil Larson is contributing member of the Standards Setting Committee. Public consultation of the initial draft of the standard is scheduled in London on 11th November, 2016.

Both organizations fully support the Agreement in re-establishing

the core principles of the original MOU, and to formalize an ongoing relationship with the objective of continuing to support each other's efforts to promote the status of the profession, and to leverage the best practices in terms of the cost engineering, cost management, and project controls.

**AIQS Academy Certificate Available Now
Save \$1,500!**

The AIQS Academy

The AIQS Academy is an on demand, online training portal available for all Quantity Surveying professionals. This platform provides further CPD options to AIQS Members or Non-Members and can be accessed from a location of your choice. Each topic takes approximately two hours, but completion can be at your own pace and work around your busy schedule. During the course of 2016, the AIQS Academy will roll out up to 100 topics.

The topics available have been individually reviewed and assessed at the highest standard expected by the AIQS for continuing professional development. The AIQS Education Committee will regularly review and update the offerings of the Academy, to ensure a wide ranging and relevant topics. The Academy can be used for your organisational training, enhancing the professional skills of your Quantity Surveyors.

Meet AIQS Membership Entry Requirements

The Academy can be used as a pathway to AIQS Membership by ensuring you have the necessary skills required to meet the Institute's academic entry requirements.

Applicants seeking Institute Membership with a partially qualifying degree (Pathway 2), will be able to meet the academic entry requirements by completing the 100 Academy topics available.

Participants who complete 100 topics will also receive the AIQS Academy Certificate.

Continuing Professional Development

The Academy can help you identify knowledge gaps, learn new or upgrade existing skills, as well as provide upskilling opportunities for your project team.

The Academy provides continuing professional development (CPD) opportunities for AIQS Members and Non-Members.

Undertaking CPD ensures your skills remain current and relevant in addition to ensuring you fulfill your requirements for continued membership.
